1 / 2 / 3 / 4 / 5 / 6 / 7 / 8 / 9 / 10 / 11 / 12

Question 2 of 4

Reading Time: 45 seconds

Interview Requirement for Biology Research Club

Until now, any biology major who has completed at least one year of study has been eligible to join the Biology Research Club. Starting next term, however, applicants will be interviewed by a department representative to evaluate their suitability. According to Mary Beale, the club president, this policy change will be highly beneficial. "The interview will provide an opportunity to determine how knowledgeable applicants are of the subject," she said. The additional step in the screening process will ensure that new members are capable of giving presentations on advanced topics during club seminars.

Now get ready to answer the question.

The man expresses his opinion regarding the announcement. State his opinion and explain the reasons he gives for expressing that opinion.

00: 00: 30

RESPONSE TIME

00: 00: 60

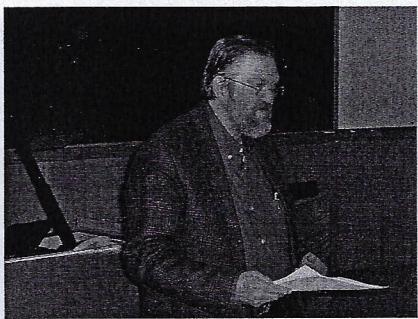

Question 3 of 4

Reading Time: 45 seconds

Token Reward System

Rewards can be powerful tools when it comes to changing people's behavior for the better. One of the most effective ways in which negative behavior can be corrected is to use a token reward system. This system utilizes tokens, such as points or fake money, to encourage individuals to engage in desirable behavior or refrain from unacceptable behavior. Once the tokens are earned, they can be exchanged for a variety of rewards, which might include services, privileges, or items. This system is applied in many different kinds of organized settings, such as schools, prisons, and psychiatric hospitals.

Now get ready to answer the question.

Explain how the example from the lecture illustrates a token reward system.
